

Enterprise Cloud Administration + NCP-MCI Exam Prep Fast Track

GET STARTED TODAY

For class schedules, online learning access and more information visit nutanix.com/university.

AUDIENCE

- Administrators, architects, and business leaders who manage Nutanix clusters in the datacenter
- Managers and technical staff seeking information to drive purchase decisions
- Anyone seeking the Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) certification

DESCRIPTION

This unique package combines two of our most popular courses into a single, five-day training event. Value priced for two people, this is a great option to cost-effectively train multiple people on your Nutanix team at once. In addition to two seats in both classes, you will also receive two exam vouchers per person (4 in total).

The first four days of this program is used to teach the Nutanix *Enterprise Cloud Administration (ECA)* course. This class covers many of the tasks administrators typically perform on Nutanix systems to successfully configure and manage Nutanix in the datacenter, including the use of graphical user interfaces (GUIs) and command line interfaces (CLIs).

The last day focuses on preparing you for the Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) exam. We will highlight important concepts that you learned during the ECA course as we walk you through all exam topics in condensed format, supplemented with more than one-hundred test questions.

COURSE OUTLINE

- **Introduction** The section describes the history of cloud computing, explains the Nutanix solution, walks you through the components of the Nutanix Enterprise Cloud, and explains the relationship between physical and logical cluster components.
- **Managing the Nutanix Cluster** In this section, you will use the Prism console to monitor a cluster, configure a cluster using various interfaces, use the REST API Explorer to manage the cluster, and learn about Nutanix-specific PowerShell cmdlets.
- **Securing the Nutanix Cluster** This section shows how to secure a Nutanix cluster through user authentication, SSL certificate installation, and cluster access control.
- **Acropolis Networking** This section explains how to configure managed and unmanaged Acropolis networks and describes the use of Open vSwitch (OVS) in Acropolis. You will learn how to display and manage network details, differentiate between supported OVS bond modes, and gain insight into default network configuration.

COURSE DETAILS

Learning Methods:

Instructor-led

- 5 day virtual delivery
- Available in English or French
- Hands-On Labs included
- Includes two free NCP-MCI exam vouchers per person
- *Contact us for pricing and training options at NutanixTraining@nutanix.com*

- **VM Management** This section shows you how to upload images, and how to create and manage virtual machines.
- **Health Monitoring and Alerts** In this section, you will use the Health Dashboard to monitor a cluster's health and performance. You will also use Analysis Dashboard to create charts that you can export with detailed information on a variety of components and metrics. Finally, you will learn about log collection, the format of log entries, and the Nutanix Support Portal.
- **Distributed Storage Fabric** This section discusses creating and configuring storage containers, including the storage optimization features: deduplication, compression, and erasure coding.
- **AHV Workload Migration** Using Nutanix Move, this section shows how to migrate workloads to a cluster running AHV. This is followed by a lab where a VM running on a Nutanix cluster configured with ESXi is migrated to a Nutanix cluster running AHV.
- **File and Volumes** This section gives you detailed information on Nutanix Volumes, which provides highly available, high-performance block storage through a few easy configuration steps. It also discusses Nutanix Files.
- **Understanding Infrastructure Resiliency** This section shows how Nutanix provides comprehensive data protection at all levels of the virtual datacenter: logical and physical.
- **Data Protection** Data can be replicated between Nutanix clusters synchronously and asynchronously. This section shows how to configure a Protection Domain (PD) and Remote Sites, recover a VM from a PD, and perform a planned failover of a PD. You will also understand various configurations and requirements specific to a ROBO site. This includes hardware/software, Witness VM, networking, failure and recovery scenarios for two-node clusters, and the seeding process.
- **Prism Central** Having discussed and used Prism Element earlier, this section looks at the capabilities of Prism Central. With the added functionality provided by a Pro license, the focus is on features related to monitoring and managing multiple activities across a set of clusters.
- **Cluster Management and Expansion** This section outlines essential life-cycle operations, including starting/stopping a Nutanix cluster, as well as starting/shutting down a node. You will also learn how to expand a cluster, manage licenses, and upgrade the cluster's software and firmware.

RELATED CERTIFICATION

Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI)

NCP-MCI certification holders have demonstrated the skills and knowledge to manage Nutanix AOS nodes, blocks, and clusters in the datacenter. Earning it validates your ability to deploy, administer, and troubleshoot Nutanix AOS, proving your mastery of key concepts from VM management to lifecycle operations.

Please note: The course material is intended to cover 70-80% of the knowledge on the exam, with the rest of your exam prep coming from independent study and/or experience.

TERMS AND CONDITIONS

- Customer must purchase training seats in advance of scheduling course dates.
- Customer may not cancel purchased training seats and all amounts paid are non-refundable.
- Customer may reschedule courses with no less than 15 business days written notice to Nutanix. Rescheduling fees may apply.
- Customer may substitute a student with no less than 5 business days written notice to Nutanix. Rescheduling fees do not apply to substitutions.
- All training seats must be consumed within 12 months of purchase. Failure to utilize the training seats within the 12 months of purchase shall result in forfeiture of all fees paid for such seats. Extensions may be available on a case by case basis.
- Nutanix reserves the right to cancel any scheduled course due to minimum enrollment not being achieved, instructor illness, or other events outside of its control.
- Cancellation notices will be sent to enrolled students by email with rescheduling information and alternative training options.
- Both ECA and NCP Exam Prep seats need to be scheduled within the same week as a 5-day course.
- Participants can schedule their week of ECA + NCP Exam Prep independently from each another.
